

Climate Change Institute

@ClimateChange_z

Supporting projects that reduce emissions to mitigate #ClimateChange

Emission Reduction Program

@ClimateChange_p

This program is provided free as a public service by the Climate Change Institute to help organisations implement emission reduction and energy efficiency.

Certified Climate Friendly

@ClimateChange_w

Get free certification for your company when you offset your emissions and gain exposure over one of social media's most popular environmental networks

The Carbon Trading Market

@ClimateChange_x

The Carbon Trading Market is a system to financially support carbon reduction projects and is probably our only real chance to reverse #ClimateChange.

Carbon Reduction Projects

@ClimateChange_e

The Climate Change Institute supports research and development of projects to reduce carbon dioxide and mitigate Global Warming.

Climate Change Institute Carbon Reduction Projects

@ClimateChange_k

The Climate Change Institute is an Australian organisation which provides support for market based projects to reduce the amount of carbon in the atmosphere.

Carbon Credit Store - eBay style Auction Platform

@ClimateChange_f

Carbon Credit Certificates at the right market price from a range of world's best sellers for cost-effective projects supported by the Climate Change Institute.

Virtual Reality Climate Research Simulator

@ClimateChange_h

The Virtual Reality Climate Simulator - researched and developed by the Climate Change Institute.

Climate Change Institute Carbon Calculator

@ClimateChange_l

We can reverse climate change if individuals and organisations commit to having a low footprint. Try the Climate Change Institute's FREE carbon calculator.

Invest in Fighting Climate Change

@ClimateChange_v

The science on #climatechange is clear. Unless we reduce our emissions we are going to leave a climate catastrophe for future generations.

Climate Change Institute Newsroom

@ClimateChange_t

Visit climatechange.org.au/newsroom/ see the latest #climatechange news & commentary broadcast on our social media network of over 500,000 followers on 25 sites

We can all help to stop climate change

@ClimateChange_y

We must not wait for governments to act. If enough consumers will reward low emitting companies by buying their products then we can help to stop climate change

Go Climate Friendly

@ClimateChange_u

Companies that are seen as being Climate Friendly by consumers will have an advantage in the markets of the future.

What are Carbon Offset Certificates?

@ClimateChange_n

When you buy Carbon Offset or Carbon Credit Certificates you are investing in projects that reduce carbon in the atmosphere. Visit the Climate Change Institute.

Climate Change Institute News

@ClimateChange_g

The Climate Change Institute brings you the latest research and information on viable solutions to the Global Warming Crisis

Australian Water Management Project

@cabon_farmers

Feasibility study into transferring water to dry areas in Australia enabling the planting of trees and vegetation to capture carbon to reduce global warming.

Clim Inst

[/climatechangeinstituteaust](#)

Working on viable projects that will capture carbon to reduce global warming.

Climate Change Institute

[/climatechange111](#)

Researching solutions to global warming by capturing carbon.

Steph Gee

[/climateaction1](#)

Works at Climate Change Institute promoting projects to capture carbon to reduce global warming

The Climate Change Institute

[/climatechange222](#)

Australian Climate Change Institute aims to put forward solutions to the global warming crisis.

[/climatechange-guy](#)

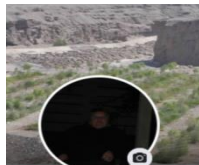

Working at the Climate Change Institute seeking viable solutions to climate change

Climate Change Research

[/climatechange333](#)

Visit our website to see the latest research on solutions to climate change that involve removing carbon from the atmosphere

Sammy Teuel

[/nomoreclimatechange](#)

Working at Climate Change Institute on projects that aim to to remove carbon from the atmosphere.

Climate Change Solutions

[/climatechange444](#)

The Climate Change Institute researches viable solutions to mitigate global warming

Climate Change Institute's Carbon Capture Protects

@ClimateChange_q

Reducing emissions is important but that will not get rid of the carbon already in the atmosphere which will otherwise stay there for thousands of years.

Carbon Credit Certificate Projects in Germany

@CarbonCredit_9

The Climate Change Institute brings you the best information on Carbon Credit Certificate Projects in Germany

Carbon Credit Certificate Projects in Europe
